## • Minimum Invasive Lithotripsy

- ☐ Breaks kidney stones into tiny pieces. The stone fragments are then excreted through the urine over a period of several days.

Dr. Yacoub has been treating kidney stones with minimally invasive procedures for more than 10 years and over 30 years in the medical field. Well known in his community and regarded as a Doctor who really cares about his patients. Dr. Yacoub is double Board Certified in Urology and General Surgery.

Our state of the art facility and equipment, a team of professionals with the best training and many years of experience.

Montebello Urological Associates offers minimally invasive urologic procedures, diagnostic testing, advanced treatments, and high quality care for a wide range of medical conditions involving the male and female urinary tract and male reproductive organs.
